

Dheeraj Verma

AI/ML Engineer | MLOps | Problem Solving

+91 8957250428 | dheerajverma.cp@gmail.com | [linkedin.com/in/-dheeraj-verma](https://www.linkedin.com/in/-dheeraj-verma)

Education

Jaypee University of Engineering and Technology, B.Tech Computer Science and Engineering 2022-2026

Micro-specialization in Artificial Intelligence and Machine Learning

Experience

Prodigy Infotech | Generative AI Intern | <https://prodigyinfotech.dev/> 8/2025 – 9/2025

- Implemented an **image-to-image translation model** using **conditional GAN (pix2pix)** for paired image datasets.
- Engineered and trained **generator-discriminator architecture** in **TensorFlow/Keras**, achieving high-quality image outputs.
- Applied **data preprocessing, loss optimization, and training stabilization techniques** to improve model accuracy and stability.
- Gained hands-on expertise in **GAN-based architectures, adversarial training, and computer vision applications**.

Proxenix | Data Science and Analytics Intern | <https://proxenix.com/> 4/2025 – 6/2025

- Fine-tuned **BART** transformer on domain documents, reducing reading time by 70%
- Designed **NLP pipelines** for large datasets with **tokenization, embeddings, and model optimization**.
- Experimented with transformer **fine-tuning** and evaluation metrics (**ROUGE, BLEU**) for summarization quality.

Projects

YouTube Sentiment Insights – MLOps Project | [GitHub](#)

- Developed end-to-end **CI/CD pipeline** (GitHub Actions, MLflow, DVC, Docker, AWS) automating builds, testing, and deployment.
- Configured **Docker containers** for reproducible environments and integrated version control with Git.
- Optimized LightGBM with **TF-IDF + SMOTE** achieving ~80% accuracy.

AI Fitness Assistant – Multi-Agent ML Project

- Built a **Multi-Agent RAG-powered AI fitness** assistant using **Python, Streamlit, and AstraDB**.
- Integrated **LLMs (Mistral)** for scalable, cost-effective personalized recommendations.
- Designed modular **multi-agent architecture** (nutrition, fitness Q&A, calculator) with **Retrieval-augmented generation (RAG)**, improving relevance by ~80% and reducing compute costs by ~40%.

Skills & abilities

- **Languages:** Python, C++, SQL
- **Software Development:** Git, GitHub, CI/CD (GitHub Actions), Docker, Linux
- **AI/ML :** Numpy, Pandas, Scikit-learn, Transformers, Hugging Face, Tensorflow, LangChain, LangGraph, Encoder-Decoder Architecture, Machine Learning, NLP, Deep Learning
- **CS Foundations:** Data Structures & Algorithms, OOP, System Design (basics)
- **Other:** Team Collaboration, Agile/Scrum

Position of Responsibility and Certifications

Google Developer Student Club - Coordinator 9/2023 – 8/2024

Part of Student body mentored 50+ students during interactive sessions.

Machine Learning Scientist in Python (85 hours) - Datacamp

Oracle Cloud Infrastructure 2025 AI Foundations Associate (1Z0-1122-25) 9/2025 – 9/2027

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional 10/2025 – 10/2027
